

SDB SR1000 Wireless Transmitter

SDB SR1000 Wireless Transmitter

SDB SR1000 Wireless Transmitter

The SILENT DISCO BOX SR1000 is specially designed for the SILENT DISCO BOX HDX-MULTI headphones. The transmitter has 10 preprogrammed channels. With the keyboard you can choose the color or turn off the lighting in the earcups of the HDX-MULTI. This 10 channel is truly multifunctional.

Quick Start

1. Turn the transmitter on. The display will turn on and shows a channel. Make sure this channel matches the channel on the headphones.
2. Plug in the audio input and play music from your device. The Silent Disco set is now working.
